

# WELCOME TO THE FARM SHOW

## AG In Motion

A large 640-acre outdoor farm expo in Western Canada, featuring the latest advancements in agriculture technology and equipment!

5

Ag In Motion is one of the few activities Kletke Enterprises thoroughly enjoys sending out the excellence participants, to view and learn more about Canadian Agriculture! Allowing them to spend two whole days in a different province and city, expanding their knowledge and appreciation for Canadian agriculture.

## EXCELLENCE 2025

The best part of the trip to and in Saskatoon was to see some different machinery from what I'm used to back home. It was fun to watch the sprayer drone demonstration and look at some different seeders. There were some different grain elevators, storage and dryers that were fun to see too. They had some different varieties on canola and corn that was interesting to learn about and what the overview of normal problems were and what to think about to solve them. They had some animals too that was nice to see.

Sweden

## EXCELLENCE 2025

We saw a lot of big machines, some of them the biggest in the world. I found the drone demo for spraying very interesting. They also showed us the zoom function of the drone. For example, zooming very close to crops or to search for animals. I was surprised that we also saw smaller machines from Europe. We were able to talk to some sellers, and they were all surprised that we were from Europe. It was an interesting trip to Saskatoon because we not only saw the Ag in Motion Days, but also the landscape from Brunkild, Manitoba to Saskatoon, Saskatchewan.
